REALITY ARISE

FIRE SAFETY VR TRAINING

Reality Arise is developing immersive fire-safety training for civilian employees and institutional learners.

Our current working prototype demonstrates core VR interactions and extinguisher-use mechanics while we refine the next version through professional and stakeholder feedback.

CURRENT WORKING PROTOTYPE

TRAINING DIRECTION

RECOGNIZE HAZARDS

MAKE SAFER DECISIONS

PRACTICE EMERGENCY RESPONSE

THREE MODULES IN DEVELOPMENT

HAZARD & FIRE CLASS AWARENESS

Identify common hazards and recognize relevant fire classes.

PORTABLE EXTINGUISHER DECISION & USE

Decide whether extinguisher use is appropriate, then practice the PASS technique.

EVACUATION AWARENESS

Recognize when evacuation is the safer response and follow basic exit guidance.

INTENDED INSTITUTIONAL SETTINGS

Education

Schools - Colleges & Universities - Training Centers

Workplace

Corporate - Healthcare - Government & Public Facilities

HELP SHAPE WHAT COMES NEXT

Scan to Share Your Feedback

Your feedback will help us refine the next version, strengthen its training and safety design, and assess its potential fit in institutional settings.
